

SUMMARY

- Full Stack & Backend Developer with 2+ years of experience architecting and maintaining enterprise web applications across the SDLC using Laravel, CodeIgniter 3, React, Next.js, and MySQL. Specialized in MVC architecture, Object-Oriented Programming (OOP), legacy system modernization, database optimization, RESTful API design, WebSockets, and multi-tenant architecture.

CORE COMPETENCIES

- RESTful API Development · Database Design & Modeling · Authentication & Authorization (JWT) · Role-Based Access Control (RBAC) · SQL & Query Optimization · Performance Optimization · Legacy System Modernization · Multi-Tenant Architecture · Real-Time WebSocket Applications · Automated Excel & PDF Reporting · IoT & API Integration · Stored Procedure Optimization · Inventory Management Systems · Enterprise SDLC

EDUCATION

- The Calcutta Anglo Gujarati College

Bachelor of Computer Applications (BCA)

Kolkata, West Bengal

08/2019 – 06/2022

EXPERIENCE

- Softthought

Backend Developer

Kolkata, West Bengal, India

08/2024 – Present

 - Tea Samrat (Tea Buyer Application)**
 - Legacy Modernization:** Spearheaded legacy system modernization of a CodeIgniter 3 enterprise application following MVC architecture across [TODO: count, e.g., 6] core business modules (accounting, purchasing, inventory, blending, sales, and reporting).
 - Database Optimization:** Refactored [TODO: count, e.g., 15+] complex MySQL stored procedures and indexes, replacing cursor-based logic with set-based queries to reduce query latency by [TODO: percentage, e.g., 40%].
 - Reporting & Data Handling:** Implemented server-side DataTables rendering with AJAX and JSON for large datasets of [TODO: dataset size, e.g., 100K+] records, engineering automated Excel/PDF exports and audit log workflows.
 - Core Platform Features:** Engineered [TODO: count, e.g., 20+] REST APIs, RBAC modules, dynamic dashboards, inventory tracking, purchase workflows, and file upload systems.
 - Deployment:** Configured and deployed production application builds on Apache Linux servers, maintaining [TODO: uptime metric, e.g., 99.9%] runtime system reliability.
 - Mukti (Yoga Package Management Application)**
 - System Architecture:** Architected a full-stack Laravel and React application utilizing multi-tenant architecture and OOP principles for [TODO: count, e.g., 10+] organization accounts.
 - Real-Time Features:** Integrated live event broadcasting using Laravel Reverb and WebSockets paired with Material UI components, eliminating manual page refreshes for real-time notifications.
 - Business APIs & Security:** Developed [TODO: count, e.g., 25+] REST APIs, payment gateway integrations, automated email/SMS dispatchers, and RBAC authorization rules.
 - CWMS (Client Workman Management System)**
 - System Integration:** Automated workforce tracking for [TODO: count, e.g., 500+] personnel by integrating Laravel backend with Hikvision IoT attendance hardware via custom REST APIs.
 - Reporting & Data Extraction:** Optimized complex SQL data extraction pipelines to generate automated Excel/PDF compliance reports, reducing weekly reporting prep time by [TODO: percentage, e.g., 50%].

PROJECTS

- **Sound Seeder**

[GitHub](#) — [APK Download](#)

- **Real-Time Synchronization:** Built a React Native Android application achieving sub-second synchronized audio playback across **[TODO: count, e.g., 5+]** local network devices.
- **Socket Networking:** Programmed low-latency TCP/UDP socket communication protocol handlers and automated local network device discovery.
- **Modular Architecture:** Applied OOP design patterns in TypeScript to streamline network state management and improve code maintainability.
- **Tech Stack:** TypeScript · React Native · TCP · UDP · WebSockets · Git

- **Decimen Optical Transfer**

[GitHub](#)

- **Stream Processing:** Designed an open-source TypeScript software utility for high-speed optical data transmission, stream parsing, and signal processing.
- **Data Integrity:** Structured robust error-handling routines and real-time stream decoding logic to maintain 100% data parsing accuracy during packet transfer.
- **Version & Deployment:** Managed project distribution and version control workflows using Git, HTML, and CSS web standards.
- **Tech Stack:** TypeScript · Git · HTML · CSS

SKILLS

- **Languages:** PHP, JavaScript, TypeScript, SQL
- **Backend:** Laravel, CodeIgniter 3, Node.js, Express.js
- **Frontend:** React.js, Next.js, Material UI, Bootstrap, HTML5, CSS3
- **Databases:** MySQL, MariaDB
- **API & Security:** REST APIs, SOAP APIs, JWT, WebSockets, RBAC
- **Cloud & DevOps:** Linux, Apache, Git, GitHub
- **Developer Tools:** Postman, Composer, npm, Vite

SOFT SKILLS

- Problem Solving · Organizational Skills · Analytical Thinking · Technical Communication · Team Collaboration · Debugging & Troubleshooting · Time Management · Adaptability · Continuous Learning

LANGUAGES

- English, Hindi, Bengali
