

SUMMARY

- Full Stack & Backend Developer with 2+ years of experience architecting scalable enterprise applications using Laravel, CodeIgniter 3, React, Next.js, Node.js, and MySQL. Specialized in REST APIs, database optimization, WebSockets, multi-tenant architecture, and MVC patterns. Delivered high-performance solutions across the SDLC, accelerating query speeds by 40% and streamlining enterprise workflows for 500+ users.

CORE COMPETENCIES

- RESTful API Development · Database Design & Modeling · Authentication & Authorization (JWT) · Role-Based Access Control (RBAC) · SQL & Query Optimization · Performance Optimization · Legacy System Modernization · Multi-Tenant Architecture · Real-Time WebSocket Applications · Dynamic Excel & PDF Reporting · IoT & API Integration · Stored Procedure Optimization · Inventory Management Systems · Enterprise SDLC

EDUCATION

- The Calcutta Anglo Gujarati College

Bachelor of Computer Applications (BCA)

Kolkata, West Bengal

08/2019 – 06/2022

EXPERIENCE

- Softthought

Backend Developer

Kolkata, West Bengal, India

08/2024 – Present

  - Tea Samrat (Tea Buyer Application)**
    - Legacy Modernization:** Modernized legacy CodeIgniter 3 architecture across **6** core business modules (accounting, purchasing, inventory, blending, sales, reporting), improving maintainability.
    - Database Optimization:** Refactored **15+** complex MySQL stored procedures and indexes, replacing cursor execution with set-based queries to reduce latency by **40%**.
    - Reporting & Data Handling:** Engineered server-side DataTables pagination with AJAX/JSON for **100K+** records, accelerating PDF/Excel compliance report generation.
    - Core Platform Features:** Architected secure Role-Based Access Control (RBAC) modules, powering inventory tracking, purchase workflows, and dashboard analytics.
    - Deployment:** Configured production server builds on Apache Linux environments, achieving **99.9%** application uptime with zero-downtime releases.
  - Mukti (Yoga Package Management Application)**
    - System Architecture:** Designed a multi-tenant full-stack platform using Laravel, OOP, and React for **10+** tenant organizations, isolating client data schema and configurations.
    - Real-Time Features:** Orchestrated real-time event broadcasting using WebSockets and Laravel Reverb with Material UI, eliminating manual page reloads.
    - Business APIs & Security:** Created **75+** secure RESTful APIs, JWT authentication protocols, payment gateway integrations, and automated email/SMS notifications.
  - CWMS (Client Workman Management System)**
    - System Integration:** Automated workforce attendance tracking for **500+** active personnel by integrating Laravel REST APIs with Hikvision IoT biometric hardware.
    - Reporting & Data Extraction:** Accelerated SQL data extraction pipelines for dynamic Excel/PDF compliance reports, reducing weekly admin processing time by **50%**.
  - Tech Philosophy Studio Website**
    - Frontend Engineering:** Converted Figma designs into pixel-perfect Next.js components while ensuring responsive layouts across desktop, tablet, and mobile devices.
    - Performance Optimization:** Optimized asset loading, rendering, and page performance through frontend best practices, resulting in a faster user experience.
    - Interactive UI:** Engineered scalable SVG vector animations and reusable UI components to enhance visual engagement without sacrificing performance.
    - Automation & Deployment:** Configured automated contact form workflows that send confirmation emails to users and notification emails to the organization, while maintaining CI/CD deployment pipelines.
    - Live Demo:** <https://www.techphistudio.com/>

## PROJECTS

---

### • Sound Seeder

GitHub — APK Download

- **Real-Time Synchronization:** Delivered a React Native Android app enabling synchronized audio streaming across 5+ local devices with sub-second playback latency.
- **Socket Networking:** Implemented low-latency TCP/UDP socket communication protocols and automatic local network peer discovery algorithms.
- **Modular Architecture:** Structured modular TypeScript state management architecture using Object-Oriented Programming (OOP) design patterns.
- **Tech Stack:** TypeScript · React Native · TCP · UDP · WebSockets · Git

### • Decimen Optical Transfer

GitHub

- **Stream Processing:** Formulated an open-source TypeScript utility for high-speed optical signal processing, stream parsing, and binary data decoding.
- **Data Integrity:** Established error-handling pipelines and real-time stream decoding mechanisms, maintaining 100% data parsing accuracy during high-frequency transfers.
- **Version & Deployment:** Executed release distribution pipelines and structured documentation utilizing Git, GitHub, HTML5, and CSS3 standards.
- **Tech Stack:** TypeScript · Git · HTML · CSS

## SKILLS

---

- **Languages:** PHP, JavaScript (ES6+), TypeScript, SQL
- **Backend:** Laravel, CodeIgniter 3, Node.js, Express.js
- **Frontend:** React.js, Next.js, Material UI, Bootstrap, HTML5, CSS3, AJAX
- **Databases:** MySQL, MariaDB
- **API & Security:** RESTful APIs, SOAP APIs, JWT, WebSockets, Laravel Reverb, RBAC
- **DevOps & Cloud:** Linux (Ubuntu), Apache, Deployment
- **Version Control:** Git, GitHub
- **Developer Tools:** Figma, Postman, Composer, npm, Vite

## SOFT SKILLS

---

- Technical Documentation · Cross-Functional Collaboration · Code Review · Agile Development · Requirement Analysis · API Integration · Debugging & Troubleshooting · Continuous Learning

## LANGUAGES

---

- English, Hindi, Bengali, Urdu

## HOBBIES

---

- Cricket, Music Listening, Playing Guitar
