SUMMARY

- Full Stack Developer and Backend Developer with 2 years of experience in the SDLC building and maintaining enterprise web applications using Laravel, CodeIgniter 3, React, Next.js, and MySQL. Proficient in MVC architecture, Object-Oriented Programming (OOP), legacy system modernization, database design, stored procedure optimization, REST API development, WebSockets, and multi-tenant architecture.

EDUCATION

- **The Calcutta Anglo Gujarati College** Kolkata, West Bengal
Bachelor of Computer Applications (BCA) *Aug 2019 – Jun 2022*

EXPERIENCE

- **Softthought** Kolkata, West Bengal, India
Backend Developer *Aug 2024 – Present*
 - **Tea Samrat (Tea Buyer Application):** Spearheaded legacy system modernization of a large CodeIgniter 3 enterprise application following MVC architecture for accounting, purchasing, stock management, tea blending, sales, and reporting. Managed full SDLC, feature development, debugging, software maintenance, and deployment.
 - **Database Optimization:** Refactored complex MySQL stored procedures and database indexing, replacing cursor-based logic with set-based queries to drive performance optimization and query maintainability.
 - **Reporting and Data Handling:** Implemented server-side DataTables rendering with AJAX and JSON for large datasets, developing Excel export, PDF reports, data import functionality, and audit log workflows.
 - **Core Platform Features:** Engineered REST API development, authentication, Role-Based Access Control (RBAC), interactive dashboards, inventory modules, purchase and sales workflows, and file upload systems.
 - **Deployment & Infrastructure:** Configured and deployed production application builds on Linux server environments using Apache web server for runtime support.
 - **Mukti:** Architected and developed a full-stack Laravel and React application for yoga package management utilizing multi-tenant architecture and OOP principles. Built responsive UI components with Material UI, WebSockets via Laravel Reverb, and real-time notification support.
 - **Business Features & APIs:** Engineered secure authentication, authorization, Role-Based Access Control (RBAC), REST APIs, package/member/trainer management, booking and scheduling, payment gateway integration, admin dashboards, and email/SMS notifications.
 - **CWMS (Client Workman Management System):** Built reporting features for an HRMS and attendance management system integrated with Hikvision attendance devices using Laravel, REST API integration, and SQL data extraction.
 - **Reporting & Data Pipelines:** Developed and maintained Excel and PDF reporting modules, optimizing SQL data extraction pipelines for operations and administration.

PROJECTS

- **Sound Seeder:** Android application engineered with TypeScript utilizing WebSockets for synchronized music playback across local network devices. Implemented Object-Oriented Programming (OOP) design patterns and Version Control. [GitHub](#) — [APK Download](#)
- **Decimen Optical Transfer:** Open-source software utility developed with TypeScript and Git version control for optical data transmission and parsing. [GitHub](#)

SKILLS

- **Programming Languages:** PHP, JavaScript (ES6+), TypeScript, SQL, HTML, CSS
- **Backend & Architecture:** Laravel, CodeIgniter 3, Node.js, Express.js, MVC Architecture, Object-Oriented Programming (OOP), SOLID Principles, Repository Pattern, Dependency Injection, Multi-Tenant Architecture
- **Frontend & UI:** React.js, Next.js, Material UI, Bootstrap, Responsive Design, AJAX, JSON

- **Database & Optimization:** MySQL, MariaDB, Database Design, Database Indexing, Stored Procedure Optimization, Performance Optimization
- **APIs & Security:** REST API Development, API Integration, CRUD Operations, Authentication, Authorization, Role-Based Access Control (RBAC), WebSockets, JWT, SOAP APIs
- **DevOps & Infrastructure:** Linux Server, Apache, Git, Git Workflow, GitHub, Docker, Postman, Composer, npm, Vite
- **Development Process:** SDLC, Agile Development, Version Control, Code Review, Debugging, Software Maintenance, Legacy System Modernization

LANGUAGES

- English, Hindi, Bengali

INTERESTS

- Playing Guitar, Music, Photography
