SUMMARY

- Full Stack Developer and Backend Developer with 2 years of experience in the SDLC building and maintaining enterprise web applications using Laravel, CodeIgniter 3, React, Next.js, and MySQL. Proficient in MVC architecture, Object-Oriented Programming (OOP), legacy system modernization, database design, stored procedure optimization, REST API development, WebSockets, and multi-tenant architecture.

CORE COMPETENCIES

- REST API Development · Database Design · Authentication & Authorization · Role-Based Access Control (RBAC) · SQL Optimization · Query Optimization · Performance Optimization · Legacy System Modernization · Multi-Tenant Architecture · Real-Time Applications · Excel & PDF Reporting · API Integration · Stored Procedure Optimization · Reporting Systems · Inventory Management · Enterprise Application Development

EDUCATION

- **The Calcutta Anglo Gujarati College** Kolkata, West Bengal
Bachelor of Computer Applications (BCA) 08/2019 – 06/2022

EXPERIENCE

- **Softthought** Kolkata, West Bengal, India
Backend Developer 08/2024 – Present
 - **Tea Samrat (Tea Buyer Application)**
 - **Legacy Modernization:** Spearheaded legacy system modernization of a CodeIgniter 3 enterprise application following MVC architecture for accounting, purchasing, stock management, tea blending, sales, and reporting.
 - **Database Optimization:** Refactored complex MySQL stored procedures and database indexing, replacing cursor-based logic with set-based queries to drive performance optimization and query maintainability.
 - **Reporting & Data Handling:** Implemented server-side DataTables rendering with AJAX and JSON for large datasets, developing Excel export, PDF reports, data import functionality, and audit log workflows.
 - **Core Platform Features:** Engineered REST API development, authentication, Role-Based Access Control (RBAC), interactive dashboards, inventory modules, purchase and sales workflows, and file upload systems.
 - **Deployment:** Configured and deployed production application builds on Linux server environments using Apache web server for runtime support.
 - **Mukti (Yoga Package Management Application)**
 - **System Architecture:** Architected and developed a full-stack Laravel and React application utilizing multi-tenant architecture and OOP principles.
 - **Real-Time Features:** Built responsive UI components with Material UI, WebSockets via Laravel Reverb, and real-time notification support.
 - **Business APIs & Security:** Engineered secure authentication, authorization, Role-Based Access Control (RBAC), REST APIs, package/member/trainer management, booking and scheduling, payment gateway integration, admin dashboards, and email/SMS notifications.
 - **CWMS (Client Workman Management System)**
 - **System Integration:** Built reporting features for an HRMS and attendance management system integrated with Hikvision attendance devices using Laravel, REST API integration, and SQL data extraction.
 - **Reporting & Data Extraction:** Developed customizable Excel and PDF reporting modules, optimizing SQL data extraction pipelines for operations and administration.

PROJECTS

- **Sound Seeder** GitHub — APK Download
 - **Description:** Developed an Android application for real-time synchronized music playback across multiple devices on the same local network.
 - **Key Features:** Engineered low-latency audio broadcasting, multi-device socket synchronization, playback controls, and local network device discovery.

- **Architecture:** Utilized modular Object-Oriented Programming (OOP) design patterns and custom network protocol handlers for socket communication.
- **Tech Stack:** TypeScript · React Native · TCP · UDP · WebSockets · Git

- **Decimen Optical Transfer**

GitHub

- **Description:** Engineered an open-source software utility designed for optical data transmission and data stream parsing.
- **Key Features:** Implemented data encoding/decoding routines, error handling, and real-time data stream parsing logic.
- **Architecture & Control:** Applied Object-Oriented Programming (OOP) modular design and Git version control workflows.
- **Tech Stack:** TypeScript · Git · HTML · CSS

SKILLS

- **Languages:** PHP, JavaScript, TypeScript, SQL
- **Backend:** Laravel, CodeIgniter 3, Node.js, Express.js
- **Frontend:** React.js, Next.js, Material UI, Bootstrap, HTML, CSS
- **Databases:** MySQL, MariaDB
- **API & Authentication:** REST APIs, SOAP APIs, JWT, WebSockets
- **Cloud / Server / DevOps:** Linux, Apache, Git, GitHub
- **Tools:** Postman, Composer, npm, Vite

SOFT SKILLS

- Problem Solving · Organizational Skills · Analytical Thinking · Technical Communication · Team Collaboration · Debugging & Troubleshooting · Time Management · Adaptability · Continuous Learning

LANGUAGES

- English, Hindi, Bengali

INTERESTS

- Playing Guitar, Music, Photography
