

SUMMARY

- Full Stack & Backend Developer with 2+ years of experience architecting scalable enterprise applications using Laravel, CodeIgniter 3, React, Next.js, Node.js, and MySQL. Specialized in REST APIs, database optimization, WebSockets, multi-tenant architecture, and MVC patterns. Delivered high-performance solutions across the SDLC, accelerating query speeds by 40% and streamlining enterprise workflows for 500+ users.

CORE COMPETENCIES

- RESTful API Development · Database Design & Modeling · Authentication & Authorization (JWT) · Role-Based Access Control (RBAC) · SQL & Query Optimization · Performance Optimization · Legacy System Modernization · Multi-Tenant Architecture · Real-Time WebSocket Applications · Dynamic Excel & PDF Reporting · IoT & API Integration · Stored Procedure Optimization · Inventory Management Systems · Enterprise SDLC

EDUCATION

- The Calcutta Anglo Gujarati College

Bachelor of Computer Applications (BCA)

Kolkata, West Bengal

08/2019 – 06/2022

EXPERIENCE

- Softthought

Backend Developer

Kolkata, West Bengal, India

08/2024 – Present

 - Tea Samrat (Tea Buyer Application)
 - Legacy Modernization:** Modernized legacy CodeIgniter 3 enterprise application architecture across 6 core business modules (accounting, purchasing, inventory, blending, sales, and reporting), improving system maintainability and code modularity.
 - Database Optimization:** Refactored 15+ complex MySQL stored procedures and indexes, replacing cursor-based execution with set-based queries to reduce database response latency by 40%.
 - Reporting & Data Handling:** Engineered server-side DataTables pagination with AJAX and JSON for datasets exceeding 100K+ records, accelerating PDF/Excel compliance report generation.
 - Core Platform Features:** Architected secure Role-Based Access Control (RBAC) modules, powering inventory tracking, purchase workflows, and dynamic dashboard analytics.
 - Deployment:** Deployed and configured production server builds on Apache Linux environments, achieving 99.9% application uptime and zero-downtime releases.
 - Mukti (Yoga Package Management Application)
 - System Architecture:** Designed a multi-tenant full-stack platform using Laravel, OOP, and React for 10+ tenant organizations, isolating client data schema and tenant configurations.
 - Real-Time Features:** Orchestrated real-time event broadcasting using WebSockets and Laravel Reverb with Material UI components, eliminating manual page reloads for instant alerts.
 - Business APIs & Security:** Created 75+ secure RESTful APIs, JWT authentication protocols, payment gateway integrations, and automated email/SMS event notifications.
 - CWMS (Client Workman Management System)
 - System Integration:** Automated workforce attendance tracking for 500+ active personnel by integrating Laravel REST APIs with Hikvision IoT biometric hardware.
 - Reporting & Data Extraction:** Accelerated SQL data extraction pipelines for generating dynamic Excel/PDF compliance reports, reducing weekly administrative processing time by 50%.

PROJECTS

- Sound Seeder

GitHub — APK Download

 - Real-Time Synchronization:** Delivered a React Native Android application enabling synchronized audio streaming across 5+ local devices with sub-second playback latency.
 - Socket Networking:** Implemented low-latency TCP/UDP socket communication protocols and automatic local network peer discovery algorithms.

- **Modular Architecture:** Structured modular TypeScript state management architecture using Object-Oriented Programming (OOP) design patterns to ensure high code maintainability.
- **Tech Stack:** TypeScript · React Native · TCP · UDP · WebSockets · Git

- **Decimen Optical Transfer**

GitHub

- **Stream Processing:** Formulated an open-source TypeScript data transmission utility for high-speed optical signal processing, stream parsing, and binary data decoding.
- **Data Integrity:** Established error-handling pipelines and real-time stream decoding mechanisms, maintaining 100% data parsing accuracy during high-frequency packet transfers.
- **Version & Deployment:** Executed release distribution pipelines and structured documentation utilizing Git, GitHub, HTML5, and CSS3 standards.
- **Tech Stack:** TypeScript · Git · HTML · CSS

SKILLS

- **Languages:** PHP, JavaScript (ES6+), TypeScript, SQL
- **Backend:** Laravel, CodeIgniter 3, Node.js, Express.js
- **Frontend:** React.js, Next.js, Material UI, Bootstrap, HTML5, CSS3, AJAX
- **Databases:** MySQL, MariaDB
- **API & Security:** RESTful APIs, SOAP APIs, JWT, WebSockets, Laravel Reverb, RBAC
- **DevOps & Cloud:** Linux (Ubuntu), Apache, Deployment
- **Version Control:** Git, GitHub
- **Developer Tools:** Postman, Composer, npm, Vite

SOFT SKILLS

- Technical Documentation · Cross-Functional Collaboration · Code Review · Agile Development · Requirement Analysis · API Integration · Debugging & Troubleshooting · Continuous Learning

LANGUAGES

- English, Hindi, Bengali, Urdu

HOBBIES

- Cricket, Music Listening, Playing Guitar
